Spencer Industries, Inc. has built its business by supplying the US Army, US Marine Corps, US Navy, US Air Force, Defense Supply Center Columbus, Defense Supply Center Richmond and Defense Supply Center Philadelphia for the past 40 years.

Our background is engineering oriented in the fields of electronics, electro-mechanical and mechanical military equipment. We encompass not only sophisticated electronic and electro-mechanical items, but also have machine shop and sheet-metal facilities.

Our Quality Control organization oversees incoming inspection, in-process inspection and final inspection to ensure the highest level of reliability.

As a small business, our minimal overhead and efficient performance yield competitive prices and top quality products.

Our plant has the capability and clearance for secret work.

Our experienced team can reverse engineer items in these categories and assure complete interchangeability for form, fit and function.

Please send us your requirements: large or small.

Saturday, July 30, 2016
