

# BENSELER - our locations and procedures

BENSELER has eight locations to a total of eight coating method, four deburring and industrial parts cleaning. Each site specializes in a different method to four technologies.

Find out which locations BENSELER which processes and technologies offer.

From the Virtual Navigator to **process** or **companies** or **sites**

## Coating method:

GEOMET<sup>®</sup>  
DELTA MKS<sup>®</sup>  
ZINTEK<sup>®</sup>  
ArmorGalv<sup>®</sup> zinc thermal diffusion system  
KTL cathodic dip painting  
EPS Electrostatic powder coating  
NL wet paint  
PVD plasma vacuum coating

## deburring:

PECM Precise Electrochemical Machining  
Thermal Deburring  
ECM electrochemical deburring  
HDW high pressure water jet deburring

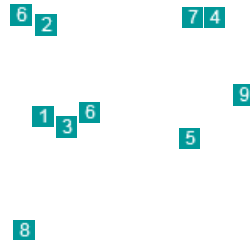

## Other procedures:

Industrial Parts Cleaning

## company:

BENSELER  
Oberflächentechnik GmbH & Co. KG, Markgröningen  
BV Oberflächentechnik GmbH & Co. KG, Werdohl  
BENSELER Coatings GmbH & Co. KG, Kornwestheim  
BENSELER coatings Sachsen GmbH & Co. KG, Frankenberg / Sa.  
BENSELER coatings Bayern GmbH & Co. KG, sheet  
BENSELER Entgratungen GmbH & Co. KG, Marbach a. N., branch Hattingen  
BENSELER Sachsen GmbH & Co. KG, Frankenberg / Sa.  
MOSER Entgratungs AG \*  
CH-Thörigen  
Prove Tech CZ sro \*, 251 01 Říčany
